

Cactus ordering

Place orders by mail or e-mail at annasperennials@gmail.com

Or Anna's Perennials

63 Shoreview Road

Lindsay, ON

K9V 4R5

Sorry-we cannot accept phone orders, COD's, or credit cards.

We only accept PayPal or money orders (made out to Anna Mizyn)

Minimum order is \$24.00 (cost before shipping)

Plants will be reserved once full payment is received.

Shipping

We will ship in early spring, and then the end of July (depend on the weather.) We will not ship during active growth of cactus and blooming season (typically June.)

All orders will be shipped by Canada Post-EXPRESSPOST, at the beginning of the week to allow for delivery before that weekend, we will contact you by phone or email to let you know when plants have been shipped.

Shipping charges

First Letter of Postal Code (1 to 6 pads)

- H, K, L, M, N - \$14.00 - more than 6 pads \$ 17.00
- B, C, E, G, J, P, R, S - \$19.00 - more than 6 pads \$ 22.00
- A, T, V, X, Y - \$24.00 - more than 6 pads \$ 27.00

Tax is included in the price.

For larger orders, contact us and we will advise you of the shipping cost.

Full payment is due with your order. Pay pal, or money order (payable to Anna Mizyn) are our only terms- we do not accept COD orders.

If for any reason, you are not satisfied with the cactus pads that you receive from Anna's Perennials, please contact us immediately within one week of receipt of cactus. We cannot guarantee the success of plants after this point because there are too many factors beyond our control.

Should you have any questions or problems please contact us via email or phone. annasperennials@gmail.com or 705-799-0062.

About Our cactus pads

Most of our cactus is grown from seeds, and thanks to that we have so much color variation as Cactii cross pollinate very easy.

Cactus pads for sale will be cut and dried for a few days prior to shipping, to cut down on weight, and preventing them from starting to rot due to excessive moisture during shipment.

How to plant

Opuntias will arrive as pad or stem cuttings. You can plant them in pots or directly in your prepared soil, ensuring the soil is well drained. Using kitchen tongs lay the pads on their side and press gently into the soil. Roots will form on the underside of the pad and give it a good start. New growth will occur in spring and summer from the edges of the original pad. Alternatively, stick the pad with cut end into the soil so that the pad is vertical. The danger in this is that the wound where it was severed from the mother plant could become infected with bacteria or fungus. Erwinia bacteria (potato soft rot,) is the common pathogen of newly planted cuttings. Keep the soil **slightly moist** until growth begins. Check for roots on the pads after opening the parcel, if they have already developed, plant that part in to well-drained soil.
